Part 2: Manual Testing

Requirements:

- 1 test case
- 1 bug report
- Another of any type of report

Test Case: Tracking Wins/Losses:

-This test will monitor the accuracy of the wins and losses tracker that is tracked from the server in conjunction to the notification that displays if the user has won or lose.

1. Click on Draw

2. Click on any two bot card's 'Add to Duo'.

3. Click on 'DUEL!' button.

4. Check the banner to see if you have lost or won.

5. Check the Wins/Losses tracker to see if this accrued correctly.

6. Click on 'Play again!' button.

7.. Repeat for a total of 10 times.

-Expected Test Postconditions

1. The wins/losses tracker should have tracked every duel successfully also without resetting.

-Actual Test Postconditions:

1. First test – lost, recorded accurately. Second test – won, recorded inaccurately. Third test – won, recorded inaccurately. Fourth test – lost, recorded accurately. Fifth test – lost, recorded accurately. Sixth test – lost, recorded accurately. Seventh test – won, recorded inaccurately. Eighth test – lost, recorded accurately. Ninth test – lost, recorded accurately. Tenth test won, recorded inaccurately.

2. Regardless of a win or lose, the app appears to be tracking all duels into Losses.

3. Test has failed.

<u>Bug reports unrelated to the Test Case above:</u>

Bug Report #1:

Notification stuck at 'Dueling….'' After clicking 'Remove from Duo' from the user's duo.
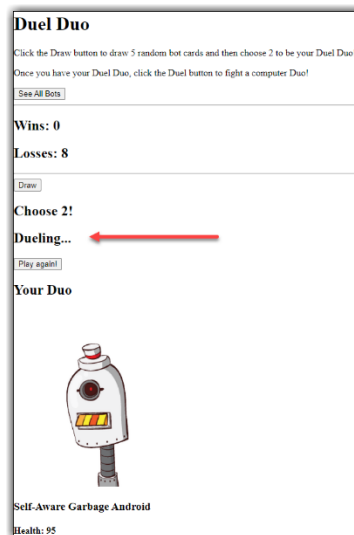

Steps to Reproduce:

1. Click Draw
2. Choose 2 bots.
3. Click 'DUEL!'
4. Click on 'Remove from Duo' from any of the user's bots.
5. Click on 'DUEL!'

Expected result:

1. Give a win or loss message (likely just a loss message because the user would have just one bot) or give a message to the user that two bots are required for a duel.

Actual result:

1. Notification is stuck at 'Dueling….'

Later input: it appears clicking on the 'Duel!' button will always result in 'Dueling…' if there not two bots drawn.

Bug Report #2:

See All Bots with no result.

Steps to Reproduce:

1. Click on 'See All Bots' button.

Expected Result

2. See a full list of all bots

Actual Results:

3. Nothing happens. An error message does appear in the console. See screenshot.
